Professional Summary

Results-driven **Data Analyst** with expertise in **Power BI, SQL, Excel, and Python**, specializing in data cleaning, exploratory data analysis (EDA), and dashboard development. Skilled in building interactive dashboards, writing optimized SQL queries, and applying statistical analysis to uncover insights. Proven ability to transform complex data into actionable business insights to support strategic and data-driven decision making.

Education

Bachelor of Technology in Artificial Intelligence and Data Science

May 2026

IFET College of Engineering, Villupuram

CGPA: 7.7

Technical Skills

BI Tools: Power BI, Excel (Pivot Tables, VLOOKUP, Dashboards), DAX

Programming: Python (Pandas, NumPy, Matplotlib), SQL

Databases: MySQL, PostgreSQL

Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Visualization

Statistics: Mean, Median, Standard Deviation, Correlation Analysis

Tools: Git, GitHub, Jupyter Notebook

Projects

Breast Cancer Detection and Segmentation Using PGSS U-Net and MeraNet

Tools: Python, TensorFlow, Keras, Streamlit

- Developed a deep learning pipeline for mammogram tumor segmentation and classification.
- Implemented PGSS U-Net for tumor segmentation and MeraNet for multi-class prediction.
- Built an interactive Streamlit application to visualize segmentation outputs and prediction confidence.

HR Analytics Dashboard using Power BI

Tools: Power BI, SQL, Excel

- Built a Power BI KPI-based dashboard to analyze employee attrition, department performance, and salary distribution.
- Designed data models by establishing relationships between multiple HR datasets.
- Implemented slicers and drill-through reports for interactive workforce analytics.

Healthcare Data Insights Dashboard using Power BI

Tools: Power BI, SQL, Excel

- Developed a healthcare analytics dashboard to analyze patient records, medical conditions, and treatment performance.
- Extracted and integrated structured datasets using SQL for analysis.
- Developed reusable DAX measures and visual reports to support hospital performance insights.

Internship

Data Analysis Intern — Cognifyz Technologies

Jan 2026 – Feb 2026

- Performed data cleaning, preprocessing, and exploratory data analysis using Python and Pandas.
- Created visualizations using Matplotlib to identify trends and insights in datasets.
- Prepared analytical reports and summaries to support data-driven decision making.

Certifications

- Power BI Data Modeling – **Simplilearn**
- Excel for Data Analysis - **Coursera**
- Python Programming – **Simplilearn**
- Power BI Masterclass – **NoviTech**
- Introduction to SQL – **Simplilearn**
- Introduction to Data Analytics – **Simplilearn**
